***Lex Informatica - SA Cyberlaw / ICT conference – 2016***

**“New Trends in Online Privacy, Domain Names , Cyber-crime, Cyber-Security , Electronic Commerce, Big data and Online Surveillance”**

**7 8 July 2016**

***Venue :***

***Protea Fire and Ice Hotel***

***Menlyn ,Pretoria***

In today’s world where just about everything is more convenient and accessible due to advance in technology across almost all sectors, it is very easy for people to use forms of technology for various crimes which end up harming the lives of others and the society we live in. This year’s conference aims to give a broader understanding on issues that affect the society technologically such as cyber-crime. We also look into aspects that protect or prevent cyber-crime such as cyber security, online privacy, big data and online surveillance.

**Cyber-crime** is a major technological crime which affects the society, it is an offence that is committed against individual or groups of individuals with a criminal motive to intentionally harm the reputation of the victim or cause physical or mental harm or loss to the victim directly or indirectly using modern telecommunication networks such as internet, chat rooms, emails, mobile phones (sms/mms). The existence of cyber-crime creates a link between cyber security and cyber-crime as it is the utmost reason for the need and usage of cyber security. **Cyber- security** is referred to as information technology security , focuses on protecting computers, networks, programmes and data from unintended and unauthorized access. The improved security of cyberspace and increase in cyberdefence results from cyber-security.

**Online privacy** which is also known as internet privacy is the privacy and security level of personal data published via the internet, with the rising use of the internet as well as online banking in businesses this brings a concern to people that hackers and viruses may have the ability to access their private information.

**Online surveillance** which is linked to online privacy is the monitoring of computers and telecommunication networks. **Big Data** on the rise; capturing, control, storage, sharing and processing of With data has become a major challenge, and whilst this has a lot of cons to it, companies can choose to rather see this as an opportunity as it can help them improve operations and make faster, more intelligent decisions, but in terms of privacy, the battle might as well be lost. How to Protect Your **Domain Name** from Cybersquatting and abusive registrations.. Safeguarding your presence on the Internet requires ongoing vigilance to uncover the
